

We're Growing

Our organization is searching for individuals specializing in:

- **Technical Sales and Marketing**
- Fabrication
- Applications Engineering
- Administration

What We Offer

As a small business in a global market, we provide unique career development opportunities. You will meet and work directly with senior management. We afford distinctive prospects; you will not be hemmed in by a rigid job description. We seek like-minded forward thinkers to act tactically and add balance to our team. In addition, we have an international focus, benefits and opportunities to travel.

Who We Are

At Purifics, we engineer solutions and develop technology to purify, separate and control fluids in a global market. Our solutions promote sustainable development, reduce lifecycle costs and eliminate risk and waste through the creation of closed loop systems. We focus on creating business growth while being mindful of the environment. Our success stems from thinking differently and managing for results. Our patented technologies are proven, robust, and unique, and we spend 6% of revenue on R&D.
