For Immediate Release  
January, 2006

### **Contract Awarded for Landfill Leachate Treatment**

**London, Ontario, Canada** - Purifics ES Inc. has been awarded a municipal contract in Nova Scotia to supply a completely automated, turn-key system for the treatment of landfill leachate. The advanced oxidation (AO) equipment, called Photo-Cat<sup>®</sup>, is a photocatalytic system that destroys and breaks down organic contaminants into carbon dioxide and water. The system is to be operational in March 2006.

***Purifics, the world leader in photocatalytic water treatment, offers unique solutions to purify, condition and control water & air to achieve economic and environmental advantage.***
