Purifics Receives Innovation Award for Sustainable Development

London, Ontario, Canada – Purifics ES Inc. is the recipient of the 2005 Regional Innovation Award for Sustainable Development (Ontario). In December, the National Research Council and the Industrial Research Assistance Program (NRC-IRAP) presented Purifics with the award at a ceremony in Queen's Park. Through its recognition of Purifics' sustainable technology, NRC/IRAP is supporting technology that significantly benefits the environment.

Purifics is committed to the development of *clean* technology to ensure the protection of the environment. Purifics' technology purifies water and air in numerous remediation, process, and potable water applications. This technology does not require chemical oxidants or other consumables, and does not generate waste. Purifics holds seven patents for technologies that support sustainable development and eliminate waste.

Purifics is a technology leader in air and water treatment, process design, and control systems. Our strength is in solving problems and simplifying solutions through innovative engineering to achieve environmental and economic benefits.
