

Purifics pre-packaged water treatment plants deliver high-performance purification in a modular, turnkey design, fully enclosed in a prefabricated building engineered **by Orenco** for durability, rapid installation, and long operational life.

Simply provide a concrete pad, and you will have a 2 MGD fully functional water purification system installed and operational **within a week**.

Key Benefits:

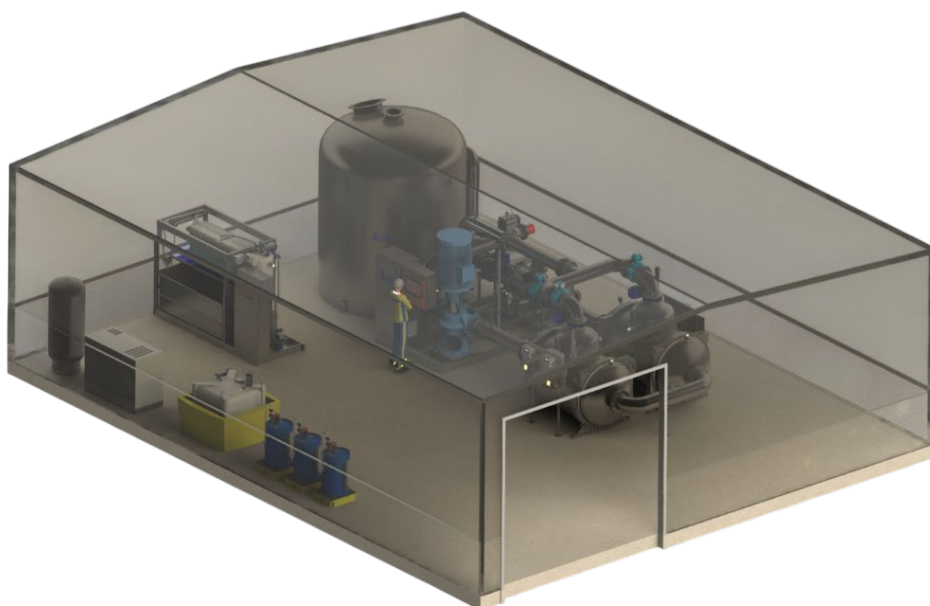

- Significant cost reduction
- Low maintenance requirements
- Faster installation & Start-Up
- No On-Site Construction or Integration
- Regulatory Standards Compliance
- Customizable
- Light weight & simplicity
- Easy to transport
